Lab 1: Use-Case Flow - UC-02 Book Interview Slot

Aryan Upadhyay | SRN: PES1UG25CS806 | Section C | Software Engineering (UE24CS341A)

Field	Detail
System	Podcast Guest Scheduling & Outline Builder
Use case	UC-02 Book Interview Slot
Primary actor	Podcast Guest
Secondary actors	Show Host (notified), Calendar Service
Preconditions	The host has published at least one open slot for the episode (UC-01). The guest has a valid, unexpired booking link from the host.
Postconditions (success)	The slot is marked booked and hidden from other guests; the guest's topic outline is attached to the episode board; calendar invites have been sent to host and guest.
Postconditions (failure)	No slot is reserved and nothing is added to the episode board.
Trigger	Guest opens the booking link sent by the host.
Includes / extends	«include» UC-03 Submit Topic Outline (step 5), «include» UC-04 Send Calendar Invite (step 9); UC-05 Join Waitlist «extend» UC-02

Main Success Scenario

1. Guest opens the unique booking link from the host.
2. System validates the link and shows the episode title, host name and open slots in the guest's local time zone.
3. Guest selects a time slot.
4. System places a 10-minute hold on the slot and shows the guest details and outline form.
5. Guest enters name, email and biography links, and adds 3-10 bullet-point discussion topics (UC-03).
6. Guest submits the form.
7. System validates the input: required fields filled, links are valid URLs, the slot is still held and is not on a blocked date.
8. System confirms the booking, marks the slot as booked, and attaches the topic outline to the episode board.
9. System sends calendar invitations to the guest and the host through the **Calendar Service** (UC-04).
10. System shows the guest a confirmation with the date, time and recording link, and notifies the host. Use case ends successfully.

Alternate Flows

3a. Slot taken or hold expired

- 3a1. Another guest books the same slot first, or the 10-minute hold expires before submission.
- 3a2. System shows "This slot is no longer available" and refreshes the list of open slots, keeping the outline already typed.
- 3a3. Flow resumes at step 3.

2a. No open slots (UC-05 Join Waitlist extends UC-02)

- 2a1. System shows "No slots available" and offers to join the waitlist.
- 2a2. Guest leaves an email address; the system notifies the guest when the host publishes new slots. Use case ends.

9a. Calendar Service unavailable

- 9a1. The booking stays confirmed. System emails both parties an .ics calendar file and retries the Calendar Service every 5 minutes for up to 1 hour.

2b. Link invalid or expired: system shows "Link expired - ask the host for a new invite" and the use case ends (NFR-002).
